*Oil prices are predicted to skyrocket over \$100 per barrel  
Be Prepared! Lock in your fixed rates today!*

Dear Homeowner,

\$80, \$100, even \$150 per barrel—experts have predicted that oil will make huge jumps in costs in the coming years. That means tremendous increases in your home heating oil bills.

What if you could lock in a fixed rate for your heating oil?

*We're offering a fixed rate through March 2008, including professional repair and service coverage at no additional charge, for only \$2.299 per gallon\* with our 5-year Fixed Rate Program. (You can save even more...keep reading to find out how!)*

Why lock your heating oil rates in now? Prices have been dropping...but that won't last forever. Politics, terrorism, weather, even simple supply and demand, can put a strain on oil supplies, causing prices to rise, placing a burden on your ability to maintain your budget.

You've seen what happened with Hurricane Katrina, the Alaska Pipeline Shutdown, and the effects other major world events have caused to the flow of oil. Lock in your fixed rates before these situations change in an instant, sending your home heating oil bills soaring.

What Consumer Energy Group's Fixed Rate Pricing means for you:

- Your cost per gallon remains the same through March 2008—no matter what
- You receive our fast, professional service and support plan included at no additional charge—a \$150 value
- Worry Free Automatic Delivery
- You can choose a budget plan to keep your bills even more predictable
- You're guaranteed the lowest fixed price per gallon that we offer for the life of your program

**Why is Consumers Energy Group (CEG) offering fixed rates when many oil delivery companies won't?**

**First of All, We Live in YOUR Community...**

We understand your concerns about the costs of home heating oil. Keeping your family warm throughout the winter is your number one concern—and ours. Not only do we live in your community, but we also use oil to heat our homes. So, we're also affected by abrupt changes in oil prices. That's why we try to find every way possible to keep our oil prices down.

**And Most Importantly, CEG is the HOME HEATING OIL FIXED PRICE LEADER...**

Other companies only verbally promise fixed prices for a few months. CEG guarantees your fixed prices for up to 5 years IN WRITING. CEG's buying power, and experience trading in the oil commodities markets allows us to do what our competitors won't.

And ultimately, Fixed Rates will help you to plan your monthly expenses and keep one less cost from surprising you in the future.

How can we afford to offer our low fixed rates?

Buying oil in huge quantities far in advance allows us to pass these savings on to you. Consumers Energy Group is part of a larger home heating oil co-op, CareCo\*\*. With more than 10,000 members and growing, we plan for the future by buying today.

We'd love to add you to our growing membership so you can enjoy the buying power and low rates that our other satisfied members do. For a small \$25 annual membership fee you can start saving hundreds, even thousands of dollars on your heating oil bills.

### Professional Service and Support – At NO Additional Charge

As a thank you for joining, we'll include our professional service and support. Most oil delivery companies won't offer free service and support, or if they do, the costs are added to your heating oil price per gallon. Our bronze-level coverage, with emergency service 7 days per week, included annual tune-ups, and boiler, furnace and hot water heater service, will help keep your home heating system running at top efficiency and it covers many major repairs including parts and labor!

*Act Now! Before the next event causes oil prices to soar. . .*

We want you to understand your options when it comes to heating your home and maintaining your equipment. Please call us today for more information about our excellent fixed rate programs and service coverage options.

### Is BioFuel Right For You?

Clean, Efficient, Renewable, Non-Hazardous, Non-Toxic, and Made in the USA. For the same cost as regular home heating oil, you can use a specially blended BioFuel consisting of 10% soybean and other vegetable oils. It burns cleaner and is 100% compatible with your current system. Ask for BioFuel when you join our 5-year fixed rate program today.

Sincerely,

Anthony Losquadro  
*President*

PS. As an extra special thank you for joining our 5-year Fixed Rate Program, we'll include your first 200 gallons at only \$2.099 per gallon! You'll save at least \$40 right away on your first oil delivery. You can also email to make an appointment to speak with one of our service representatives at [join@consumers-energy.com](mailto:join@consumers-energy.com).

\*Fixed price is for 5-year plan only. Our 5-year plan guarantees you'll receive the lowest fixed price per gallon when we reset our prices each year. 1- and 3-year plans are also available; fixed price per gallon will be higher.

\*\*CareCo. Inc. Coalition Against Rising Energy Costs is a non-profit co-op that allows members to take advantage of group buying power for purchasing home heating oil.

#### DISCLOSURE NOTICE

Limited Time Offer, offer subject to credit approval and terms of the Oil Delivery Contract. Offer not valid in Nassau County.

What is Fixed Pricing? Your oil supply is purchased in advance by Consumers Energy, and your price of oil is set once per year as per the terms of the oil delivery contract. If the oil markets fall after the price is reset, you may not realize any savings. If the price of oil increases after the reset date, your price is protected. The price of oil can be subject to substantial fluctuations either higher or lower, due to events beyond CEG's control. Your actual savings may vary.
