

Dear Technology Professional,

Is developing software a risky process for you?

We can help you *minimize* your *risks* and smooth out your software development process with our precise project management, quality control, scalable teams, and affordable, flexible pricing!

TeT Co. Ltd. is a privately-held information Systems Company located in Odessa, Ukraine. We've been in business since 1992 providing quality programming worldwide. In fact, in the past 7 years we've worked with many US companies, completing dozens of projects, from small e-commerce Web sites to asset management and CRM systems.

Yes, we are located around the globe, but no need to travel. With our weekly reporting and your ability to track your project's progress online, **you remain in complete control**. You approve the test plans and procedures, and our teams provide you with full documentation and source code when the project is complete.

No security concerns. Keeping your intellectual property confidential is our highest concern. In fact, all code and documentation becomes your company's property, and we will never work simultaneously on your direct competitor's projects.

Cost is no problem. Our rates are dramatically lower than US software developers, and even lower than other traditional outsourcing regions. We are able to keep our rates low due to the reduced cost of living in Ukraine, **without sacrificing talent**. We have put together a team of highly trained and qualified software engineers with an average of 10 years experience.

No language or cultural barriers. Not only is English spoken at TeT, but every developer has English reading and writing skills. We enjoy the same love of working, humor and attitude towards life that you do! In fact, the city of Odessa has historically been a crossroads of many cultures that have brought their traditions and ideas to form a melting pot similar to the United States.

Visit our Web site, www.tet-soft.com, and let us show you how we can solve your software development problems. Or contact us today, by phone or e-mail, with any questions that you may have. Your questions will be answered quickly and openly. (Please remember that Odessa is 7-hours ahead in time)

We are committed to meet *your* requirements, and we'll never undertake a project we can't complete!

TeT, your reliable software development partner.
