

Noise! Dirt! Cold!

Can't keep these invaders from entering your home?

Imagine your home as a sanctuary, a place to find peace—a retreat from the outside world where you can enjoy subtle, clear sounds of music, laughter and conversation of family and friends, and everyone can breathe easier and feel warmer.

You can with the addition of Soundproof Windows and Doors!

Noise, dirt and drafts invade your home, shattering your peace, invading your space—disturbing your sleep! Highway traffic, blaring sirens, noxious fumes and allergens enter through your windows. Even double-paned windows can't block them.

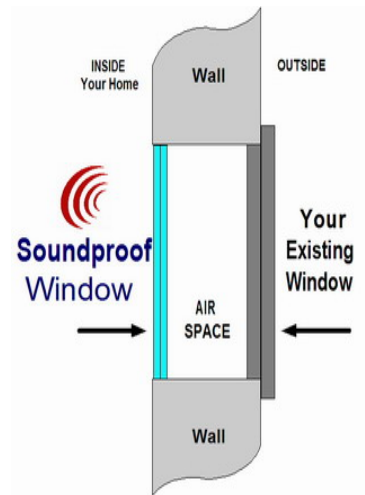

But there is a solution—Don't replace your current windows and doors; Soundproof them. By adding Soundproof Windows, Doors, Sliding Patio Doors and Skylights you can stop 75-95% of external noise, reduce your energy costs and keep your home allergen free!

Your new soundproof windows are not replacement windows—your windows remain intact. Soundproof windows are installed inside, behind your current windows creating an inner barrier—a Zero-Tolerance Seal—that eliminates up to 100% of drafts, moisture, dust, dirt, odors, pollen and UV rays from entering your home—and they open just like your current windows.

We can custom build your soundproof windows to fit any shape and match the design of your home—even oddly shaped and cathedral windows. **Installation is fast and easy with no mess or destruction.** And with no changes to the exterior of your home you can begin enjoying the peaceful, cleaner inner space of your home quickly and easily, and your neighbors won't know the difference—you will!

Don't let noise, dirt and odors keep you from enjoying your home.

Call 877-438-7843 to make an appointment for an onsite demonstration, or visit www.soundproofwindows.com for more information.
